***Allowable Subject Matter***

Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: patentability resides, at least in part, in the flexible circuit connector having a movable cover and a pair of mutually symmetrical anti-disengagement panels, whereby each panel is equally structured from a lower panel, a blocking panel and an insert-fit panel, the lower panels are adapted to be horizontally defined, while the blocking panels are adapted to be of a perpendicular panel form, and the insert-fit panels are of a perpendicular panel form, defining a mutually parallel structure from the mutually separated perpendicular panels, and therefrom form two upright sides of the horizontal lower panel furthermore, the insert-fit panels lodge into chase recesses of an insulator, and when pulling up the movable cover, the blocking panels of the anti-disengagement panels confines the wing panels of the movable cover by means of the perpendicular panel to prevent disengagement of the movable cover.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lee 6,345,998, Chang 6,319,052 and 6,280,240, Miura et al. 6,315,603, Aso et al. 5,354,214 and McHugh et al. 5,688,143 were cited for similar connectors.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
